DETAILED ACTION

The reply brief filed 2/1/2005 has been entered and considered.

In the reply brief filed 2/1/2005 (Remarks, page 2 of 5), the Applicant mainly argued that "in order to establish a prima facie obviousness rejection all the claim limitations must be taught or suggested by the prior art, there must be a reasonable expectation of success, and there must be some suggestion or motivation either in the references themselves or in **the knowledge generally available to one of ordinary skill in the art (emphasis added)**, to modify or combine reference teachings (M.P.E.P., sections 2143.01 and 2145) and further argued that " there is no reason to select a platinum conductive wire in the Steen et al.-U.S. Patent No. 6,213,995 device and further there is no reason to substitute a tungsten conductive wire for a platinum conductive wire in the Steen et al.-U.S. Patent No. 6,213,995 device."⁴

The Examiner would like to assert that column 5, line 14-18, Steen et al.-U.S. Patent No. 6,213,995 reference does disclose platinum as a conductive wire. Further, tungsten is a well known conductive material and because the material data/tables listing conductivity of various conductive materials are available from handbooks/engineering material handbooks/text books/internet data (please see material data attachment in the "Examiner's Answer") and these books/internet data are considered as a common source of **knowledge generally available to one of ordinary skill in the art (emphasis added)**, it would be reasonable to conclude that one of ordinary skill in the art can easily be aware of or easily recognize that tungsten is a material having a better conductivity than that of a platinum, and therefore a tungsten conductive wire can be a better substitute for a platinum conductive wire disclosed in Steen-'995 reference.

Art Unit: 3731

Conclusion

The application has been forwarded to the Board of Patent Appeals and Interferences for decision on the appeal.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
